

At MapUp we are passionate about transforming mapping into a practical decision-making tool for commuters, commercial transporters, city planners and mobility providers. We are building a unified routing intelligence and payment platform by integrating disparate & dynamic data sources like curb data, weather, traffic, tolls, parking and payments.

TollGuru, our marque product, is world's largest toll intelligence platform with complete coverage for toll roads in USA, Canada, Mexico, Europe, India, and South America. Our robust technology platform delivers reliability, efficiency, and seamless experience for rideshares, OEMs, TMS-providers, fleets, and truckers. We learn fast, think big, and support each other's growth and development.

This is for you :-)

Compare routes

Home screen basics

Enter addresses (pg. 7)

Hamburger menu
(Do not eat)

Zoom the map
to your current
location

Change map
layer

Tap to see the
live traffic,
tap again
to hide it

This is the beginning of something great!

Settings to get you started

Login with your email here

Add/update vehicle settings

See a list of your favorite addresses and recently searched addresses

Liked the app? Let your family and friends know!

We have got a detailed manual too, if want to dig deeper!

Add/delete your toll tags

Select your geographical region and preferred app language

Let us know if you have suggestions

SOS if you need further help

Have toll questions? Refer to universal toll encyclopedia here!

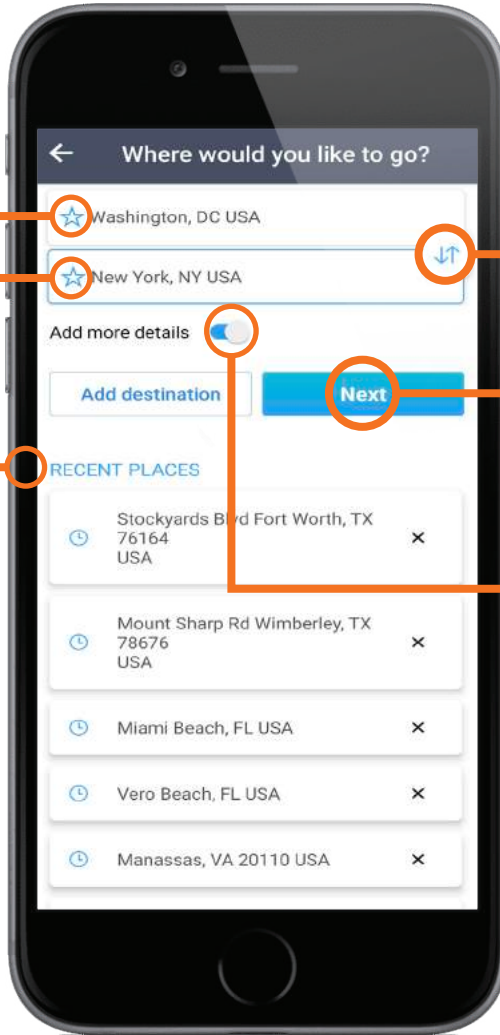

Tap that hamburger menu and see the major things to get started!

Where would you like to go?

Enter your current location/start address here

Enter destination address

Your most recent searched addresses

Switch the addresses!

All set?
Let's calculate routes! (pg. 8)

I want to customize the trip cost calculations further!

Enter your location, destination and see the route even before traveling on it!

Customize trip calculations

Select your vehicle type here

Enter the fuel price that you paid at the gas station or use default

Set your trip departure date & time

Add your vehicle specific fuel efficiency or use default

Select your toll tag/multiple tags

Time bound? Enter the amount you are willing to pay to save 15 minutes of travel time!

The image shows a smartphone screen with the 'Enter trip info' form. The form includes the following fields and options:

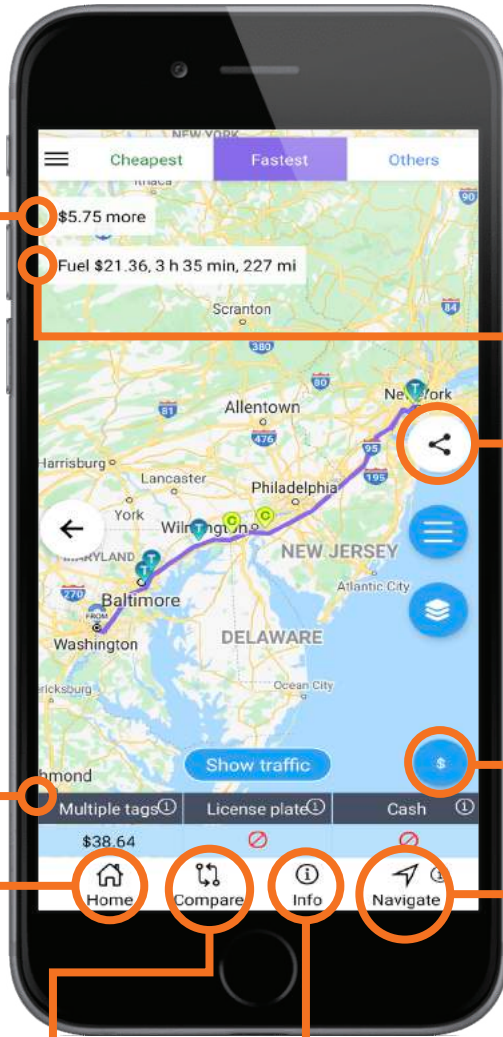

- Origin: Washington, DC USA
- Destination: New York, NY USA
- Vehicle Selection: A dropdown menu with a car icon and the text 'Car, SUV or Pickup truck'. An orange circle highlights this dropdown.
- Fuel Efficiency: A dropdown menu with a downward arrow. An orange circle highlights this dropdown.
- Fuel Price: A dropdown menu with a downward arrow and the value '2.8'. An orange circle highlights this dropdown.
- Choose toll tag: A dropdown menu with a rightward arrow. An orange circle highlights this dropdown.
- Departure time: A dropdown menu with the text 'LEAVE NOW +'. An orange circle highlights this dropdown.
- Enter Vot (Value Of Time): A dropdown menu with a downward arrow. An orange circle highlights this dropdown.
- Submit: A large orange button at the bottom of the form. An orange circle highlights this button.

All set! Calculate my route options (pg. 9)

We cover all supported vehicles and toll tags for each country covered by us!

Tolls are integral to trip decisions!

TollGuru brings transparency to travel decisions by adding the cost dimension. It allows commuters to compare the time and cost (toll and fuel expenses) for the cheapest and the fastest routes to help pick an optimal route. TollGuru Toll API is especially handy for fleets, rideshares, logistics and last-mile delivery businesses to pick cost-effective routes and accurate toll billing!

To know more, visit <https://tollguru.com>

And always remember,

If it's Tolls, it's TollGuru!
